

Protect your vehicle and your wallet.

Driving takes a toll on your car ... whether it's exposure to the sun's damaging UV rays, flying objects or anything else the road throws at you. Luckily, there's a surefire way to protect it.

Johnson Paint Protection creates an invisible shield against blemishes caused by road salt, sand, gravel and other small flying objects. Installing this product offers an invisible protective layer against the elements.

Made with a clear, proprietary, scratch-resistant and virtually self-healing top coat on 6 mil transparent urethane, this shield protects your car from harsh elements, especially the "high-risk" areas of your automobile's paint.

Protect your paint against:

Stone Chips	Sand	Bug Residue
Road Salt	Road Tar	Small Flying Road Debris

HIGH-RISK AREAS:

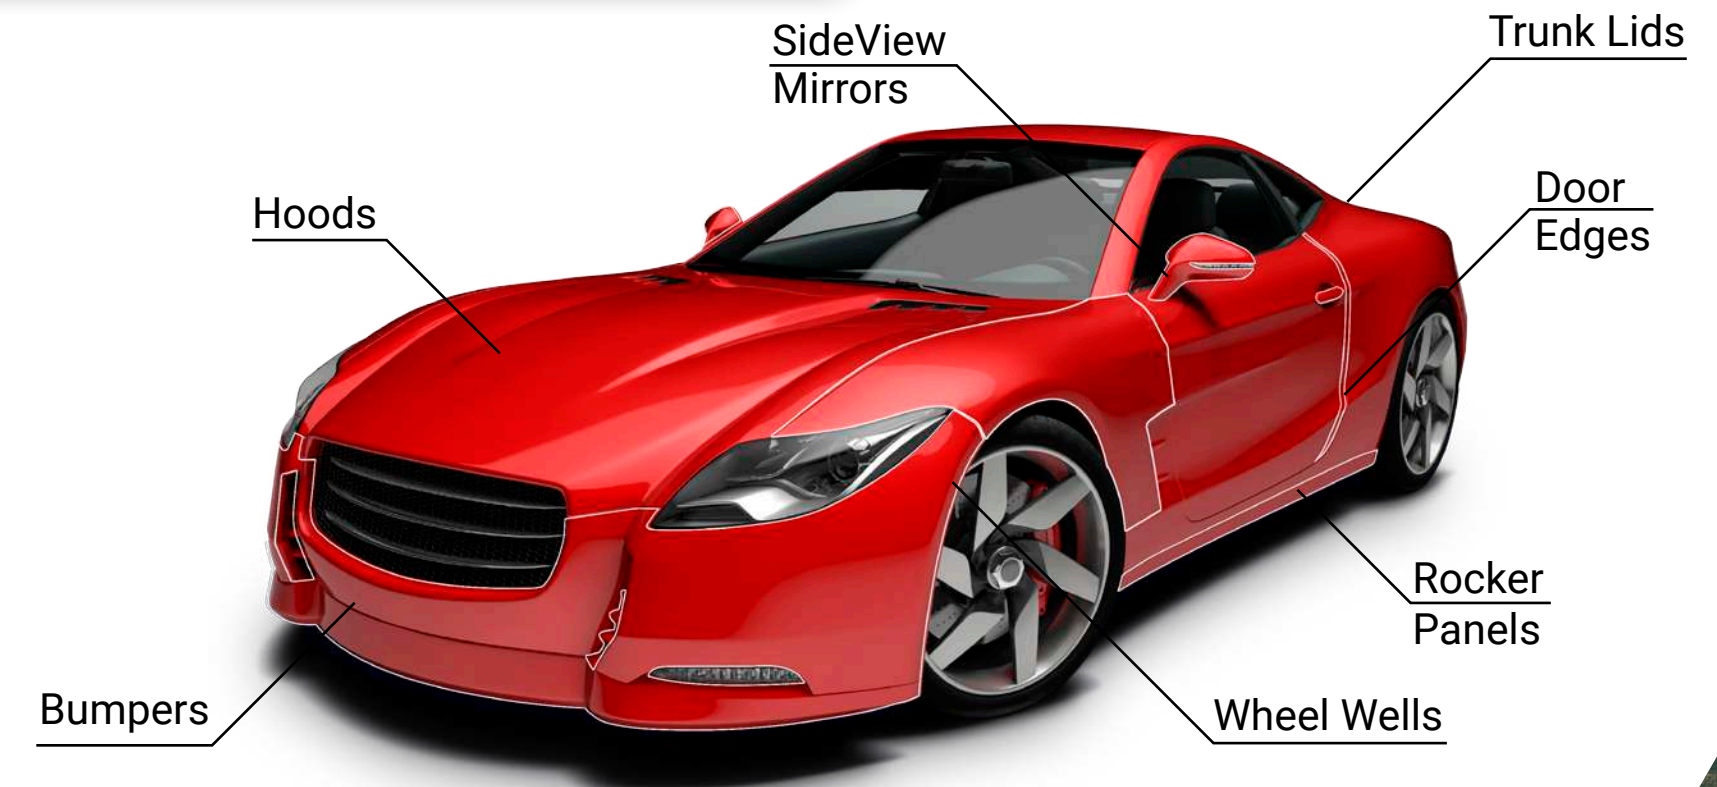

The virtually self-healing top coat eliminates fine scratches while the scratch-resistant properties result in a cleaner and clearer appearance. Your vehicle's paint will look sharp. And the high-gloss top coat will allow the true color of your finish to shine through just as it did the first day you drove it.

Johnson Paint Protection is stain-resistant to substances encountered during daily driving. If your vehicle surface comes into contact with the following materials, they should be removed as soon as possible to protect the film from permanent damage:

Gasoline	Kerosene
Motor Oil	Bird Droppings
Diesel Fuel	Road Tar
Transmission Fluid	Tree Sap

The product comes with a 5-year warranty against cracking, yellowing and bubbling.*

* Certain restrictions apply. Contact an authorized dealer for manufacturer's limited warranty information.
